LAVA CLOTH

Eliminate using kiln wash and add unique textures to your work! Lava cloth is great for dressing up the back of pieces to give them a more finished and professional look. Lava cloth is easily cut with scissors and does not stick to glass, kiln shelves, kiln brick, or fiber board. It doesn't get much easier than this: simply fuse directly onto the lava cloth. Lava cloth will last through many firings, so don't toss it until it starts to break down and gets fuzzy. Pre-firing is recommended because the cloth will shrink approximately 5% during its first firing. Each cloth has a side A and a side B, each with a different weave pattern.
